

Can a Virtual Assistant Online Really Help My Business? - Professional Advice

By Stacey Taylor

Are you an overworked business executive looking for a way to free up some time? Do you wish that you could delegate administrative tasks and concentrate on growing your business? Are you looking for a way to generate more time without having to hire a new employee?

If your answer to any of these questions is yes, your business could benefit greatly from hiring a virtual assistant online... A good virtual assistant online can save you money, time, and help you properly develop your business model. There are several benefits to hiring a virtual assistant online.... Utilizing a VA is much more cost effective and less demanding than hiring a traditional employee – a virtual assistant does not require vacation pay or benefits; and you do not have to pay for sick days, or ‘coddle’ a virtual assistant.

An effective virtual assistant online will save you money and time, AND will give you the ability to push your business model to the next level. There are several benefits to hiring a virtual assistant online.... Utilizing a VA is much more cost effective and less demanding than hiring a traditional employee – a virtual assistant does not require vacation pay or benefits; and you do not have to pay for sick days, or ‘coddle’ a virtual assistant.

More benefits to using a VA include:

- **Most virtual online assistants are available outside of regular business hours...** do you have tasks that can be completed after business hours? Get a VA and have those tasks completed when you wake up the next morning...
- **VA's are inexpensive and are easier to maintain than a traditional employee!**
- **Save time and re-allocate your resources so you can make more money!** Let's say you make \$150 an hour..... Do you find yourself giving up hours that could be billed out to do administrative tasks?

If you hire a VA to handle some administrative work for you for \$50 an hour, you can actually make more than \$150 an hour. For example, let's say 4 out of every 10 hours you charge out are for administrative tasks that could be outsourced to a VA. You are currently charging 10 hrs x \$150 = \$1500. If you outsourced 4 hours to a VA (4 X \$50 = \$200). You have now gained back 4 hours to charge out at \$150 (4 X \$150 = \$600). So you now have the potential to make \$1900 for your 10 hours rather than only \$1500.

An effective virtual assistant online will get the job done efficiently, effectively, and intelligently. The flexibility that a VA can create for you is invaluable. A VA can be hired for as little as 2 hours, or as many as the job takes.... You can hire a VA for longer projects, or just once for a smaller task. If you think you need a new employee for administrative tasks, you need to contact a virtual assistant online.
